SUMMARY

Final-year B.Tech CSE student specialising in AI/ML, with hands-on project experience spanning machine learning pipelines, data analysis, and frontend development. Proficient in Python, C++, and JavaScript with practical knowledge of Scikit-learn, TensorFlow, and Flask. Targeting placements in software engineering and data science roles; DSA-focused with 50+ LeetCode problems (C++).

TECHNICAL SKILLS

Languages: C++, Python (Advanced), JavaScript, SQL

ML / AI: Scikit-learn, TensorFlow, Keras, NumPy, Pandas, Matplotlib, Feature Engineering

Web & Tools: Flask, Streamlit, HTML, CSS, Git, GitHub, VS Code, Jupyter Notebook

Deployment: Hugging Face Spaces **DSA:** 50+ LeetCode (C++)

EXPERIENCE

Software Engineering Intern

2025

College-Mandated Internship Program — VIT Bhopal

Remote

- Completed university-mandated software engineering internship; applied core CS fundamentals including data structures, algorithms, and system design in a professional setting.
- Leveraged internship period for independent upskilling: completed structured DSA roadmap (Love Babbar playlist, Striver A2Z sheet) and advanced ML coursework in parallel.

AI/ML Intern

2025

College-Mandated Internship Program — VIT Bhopal

Remote

- Completed university-mandated AI/ML internship; applied supervised learning, data preprocessing, and model evaluation techniques to real-world problem statements.
- Used internship period to build and deploy independent ML projects using Scikit-learn, TensorFlow, and Flask, including a production-ready ML web application.

PROJECTS

ML Deployment App | Python · Scikit-learn · Flask · Pandas

2025

- Built and deployed an end-to-end machine learning web application with a Flask backend on Hugging Face Spaces, covering data ingestion, preprocessing, model training, and live inference.
- Implemented multiple supervised learning models (classification/regression) with comparative evaluation metrics; integrated interactive visualisations for feature importance and model performance.

PulseUp — Volunteer Management System | HTML · CSS · JavaScript

Jan 2025 – Apr 2025

- Developed responsive frontend interface for a community volunteer coordination platform, reducing page load time by ~30% via optimised asset delivery and lazy loading.
- Designed user-facing layouts for event listings, registrations, and announcements; optimised for low-connectivity regions using offline-first design patterns.
- Collaborated with a team of 4 on platform architecture and UX, contributing to 3 major feature releases within the project timeline.

EDUCATION

VIT Bhopal University

Sehore, MP

B.Tech in Computer Science and Engineering (AI/ML Specialisation)

Sep 2023 – May 2027

- CGPA: 8.12/10.0

Army Public School Kaluchak

Jammu and Kashmir, India

Senior Secondary Education (Class XII)

Completed

CERTIFICATIONS

University of Michigan: Applied Machine Learning in Python (Coursera) · NPTEL: Introduction to Cloud Computing · NPTEL: Internet of Things · In Progress: Complete Data Science, ML, DL & NLP Bootcamp (Udemy)
